MICRORID

POWDERED CONCENTRATE

Mold & Mildew Stain / Odor Remover

MicroRid is Twin-Chem. 's unique and highly effective mold and mildew stain remover. It is designed to be effective against all types of microbes - bacteria, mold, mildew, fungus and algae. The powdered concentrate with its “rapid dispersion technology” quickly dissolves in water to create the most powerful water-based mold and mildew stain and odor remover on the market. **MicroRid's** unique formulation is specifically designed to leave a long lasting “micro-layer” coating that retards the re-establishment of odors & stains caused by bacteria, mold, mildew and algae.

Advantages:

Utilizes the power of Hydrogen Peroxide

Unique Powder Form – No more paying for the cost of shipping water!

More Powerful - More Active Ingredient per mixed gallon

Less cost per mixed gallon – Costs less cost per square foot to use

Easily Shipped Via UPS and Fed Ex

100% ACTIVE!!! Contains No Fillers, No Harmful Bleach, No Toxic Fumes, Stable, Does Not Lose Potency Due To Heat and Light Like Liquid Products, 50 Times More Concentrated Than Liquid Products

Specifications:

Appearance ----- White Powder
Boiling Point ----- 212 F
PH ----- Neutral
DOT Shipping Class -----55
Shipping Wt. -----1 case

Odor -----Bland
Vapor Density ----- 2.2
Flash Point ----- None
Water Solubility -----Soluble

Application:

MicroRid can be used on interior and exterior wall surfaces including stone, drywall, stucco, plaster, concrete and brick.

MicroRid is also excellent for use on all kinds of surfaces such as fiberglass, Formica, glazed tiles, glazed porcelain, synthetic marble, plastic and vinyl. Other applications include exterior surfaces such as roof shingles, wood shakes, felt, stone and synthetic overcoats. **Instructions: Mix 4 oz. of MicroRid Powder Concentrate for every gallon of water, mix thoroughly until dissolved.**

Read and understand the material safety data sheet when using this product. **MicroRid** may be applied by a variety of simple techniques. It may be applied manually with a spray bottle or garden sprayer and may be applied mechanically with an airless sprayer or fogger. A bristle broom or scrub brush can be used to agitate the area. Rinse if needed, otherwise spray **MicroRid** on and leave it. **MicroRid** can be applied to any surface compatible with water such as floors, ceilings, walls, upholstery, rugs, carpets, duct-board, fiberglass, HVAC systems, air purification equipment and air filters. If spraying on any painted or dyed surfaces or materials, test for color fastness in a small inconspicuous area before using this product to insure satisfactory results.

Coverage rates will vary between 500 to 2000 sq. ft. per gallon depending on the type of surface, the surface conditions, the type of infestation and the amount of infestation. Typical coverage rates for common application methods are as follows:

Spraying 500-1000 sf. /gal.

Fogging 1000-2000 sf. /gal.

The coverage rates stated are typical starting application rates and the coverage rates may actually be higher or lower than the stated coverage rates.
