*"Safety First, Now there's Flame Shield"*

To whom it may concern,

January 9, 2008

This is a letter referencing the tests that have been completed using Flame Shield® on various substrates over the past several years. Flame Shield® has passed NFPA 701 and ASTM E-84 as well as numerous other tests regarding the performance of the product on several common substrates that are used in upholstery, draperies and bedding. If you or other interested parties wish to call for further questions, please call me.

With kindest regards,

J. Christopher Tracy  
President
