PRONTO LOCKTITE is an economical and efficient asbestos lockdown encapsulant. This is a ready to use product that is designed to lock down asbestos fibers in your work areas and help you pass even the most aggressive air tests. **PRONTO LOCKTITE** penetrates asbestos rapidly and completely. When it penetrates, it absorbs onto the individual fibers to lock them together, reducing the possibility of loose fibers from becoming airborne during the removal process.

Directions:

1. Read and understand material safety data sheet when using this product.
2. Use full strength. Using an appropriate airless sprayer, mist all surfaces to lock down loose asbestos fibers on all fireproof insulation, protective barriers and ground/floor areas after any removal procedure.
